

# LED Fairing Auxiliary Light for Harley Road Glide

VST-010102-018

## BEFORE YOU BEGIN

Read these instructions and check to be sure all parts and tools are accounted for. Please retain these installation instructions for future reference.

## IMPORTANT

This LED fairing auxiliary light is exclusively designed for your motorcycle. Please read the installation instructions thoroughly before beginning. Installation is easier if the motorcycle is clean and free of debris.

## INSTALLATION INSTRUCTIONS

Note: Shift motorcycle transmission into "PARK". Turn key to "OFF" position and remove from motorcycle.

### 1. Products Display

2. First attach the 2 mounting brackets to the rear housing of the auxiliary light in sequence. As the picture shows:

Note: Install the small bracket first (use hexagonal M3\*8 screws), after that, put the large bracket on the small bracket and then use screws and nuts to fix it (use hexagonal M6\*16 screws).

3. Remove the original windshield, fairing cover and headlights. As the picture shows:

4. There is a mounting bracket reserved in the lower installation position of the original headlamp. Place 1 M6\*16 outer hexagonal screw at each end of the original support bracket, and then put the auxiliary lamp on the screw, and use the tool to lock the nut. As the picture shows:

5. Pull the wiring harness of the auxiliary light to the windshield through the gap, connect the plug-in to the wiring harness of the original headlight, and connect the plug-in of the steering function to the steering plug-in that the original motorcycle reserved for. After docking, start the motorcycle, turn on the headlight and the steering switch to check

whether the auxiliary light works normally, and install back the original headlight and other removed decorative parts after determining that there is no problem.

6. Installation finished.

**Note:** Please refer to the installation video in the Amazon listing before your installation, or contact the seller for the installation video.
