

LED Tail Light for Honda REBEL 300

VST-010202-005

BEFORE YOU BEGIN

Read these instructions and check to be sure all parts and tools are accounted for. Please retain these installation instructions for future reference.

IMPORTANT

This LED tail light is exclusively designed for your motorcycle. Please read the installation instructions thoroughly before beginning. Installation is easier if the motorcycle is clean and free of debris.

INSTALLATION INSTRUCTIONS

Note: Shift motorcycle transmission into "PARK". Turn key to "OFF" position and remove from motorcycle.

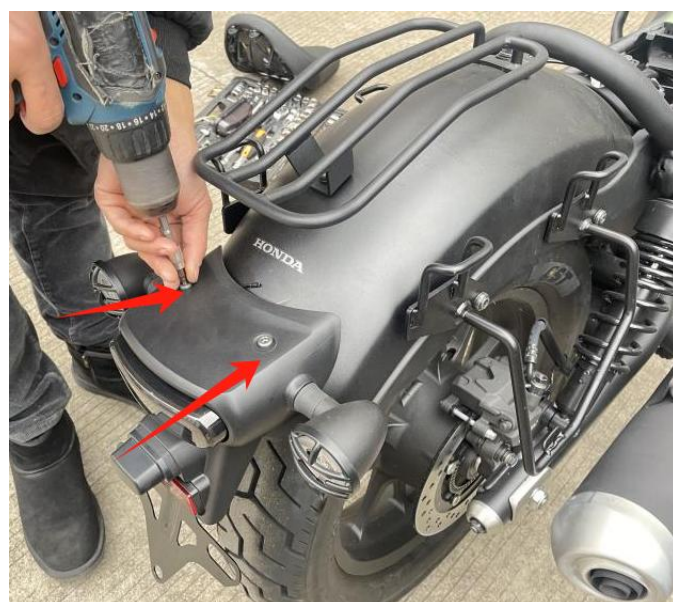

1. Products Display

2. Remove the original seat cushion and rear shelf. As the picture shows:

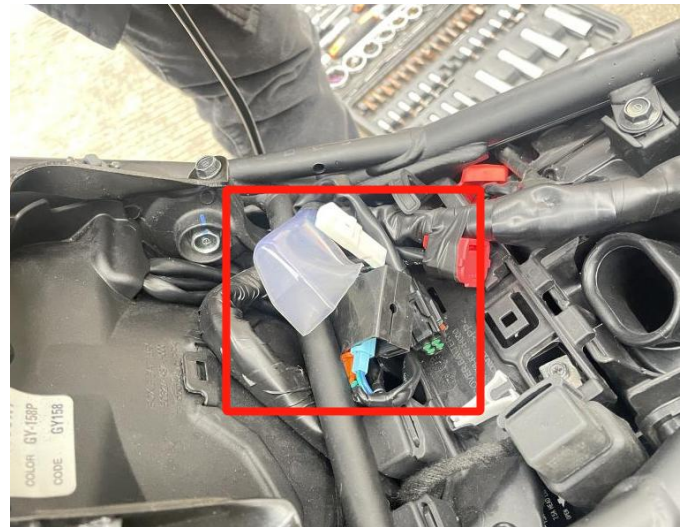

3. Pry out the fixing clip on the cover of the mudguard, separate the cover from the mudguard (to facilitate the subsequent tail light wiring harness), and then remove the original tail light outer frame. As the picture shows:

VST-010202-005

4. Remove the original license plate bracket and the original tail light (disconnect the original tail light harness connector in advance). As the picture shows:

5. Replace and install a new tail light (when installing the tail light, the water leakage port should be installed downwards). First, connect the tail light harness plug to the original motorcycle, start the motorcycle to check the tail light function, confirm it, and then fix it with screws. Finally, install the license plate bracket back in place. As the picture shows:

6. Place the wiring harness of the new tail light along the seat cushion in the same way as the original motorcycle wiring harness, reconnect the power plug, then install the outer frame of the tail light back onto the motorcycle, and finally fix the cover of the mudguard and the rear shelf. As the picture shows:

7. Finished installation.

Note: Please refer to the installation video in the Amazon listing before your installation, or contact the seller for the installation video.
