LED Headlights for BMW R1200GS 2013-2018
VST-010501-001

VEISUTOR

BEFORE YOU BEGIN

Read these instructions and check to be sure all parts and tools are accounted for. Please retain these installation instructions for future reference.

IMPORTANT

This LED headlight is exclusively designed for your motorcycle. Please read the installation instructions thoroughly before beginning. Installation is easier if the motorcycle is clean and free of debris.

INSTALLATION INSTRUCTIONS

Note: Shift motorcycle transmission into "PARK". Turn key to "OFF" position and remove from motorcycle.

1. Products Display

2. Remove the original motorcycle's beak and wing trim panels on both sides, then remove the original headlights and disconnect the wiring harness connectors. As the picture shows:

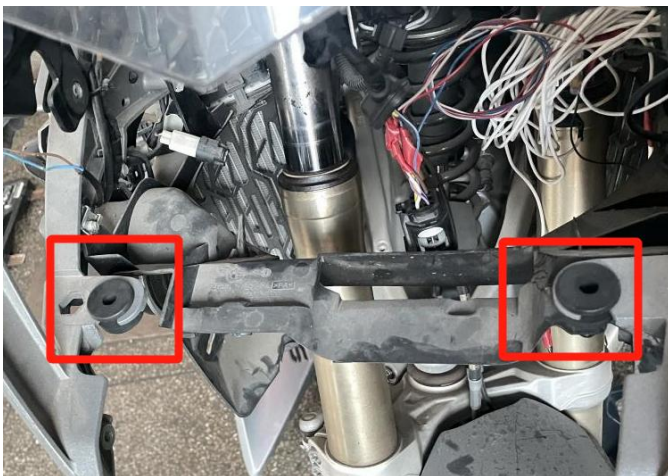

3. Remove the circular rubber plug from the original headlight rear housing, install it onto the new headlight that like original headlight position, and then reconnect the power harness. As the picture shows:

Note: When installing the headlights, the two positioning pillars on the rear shell should correspond to the rubber rings on the motorcycle
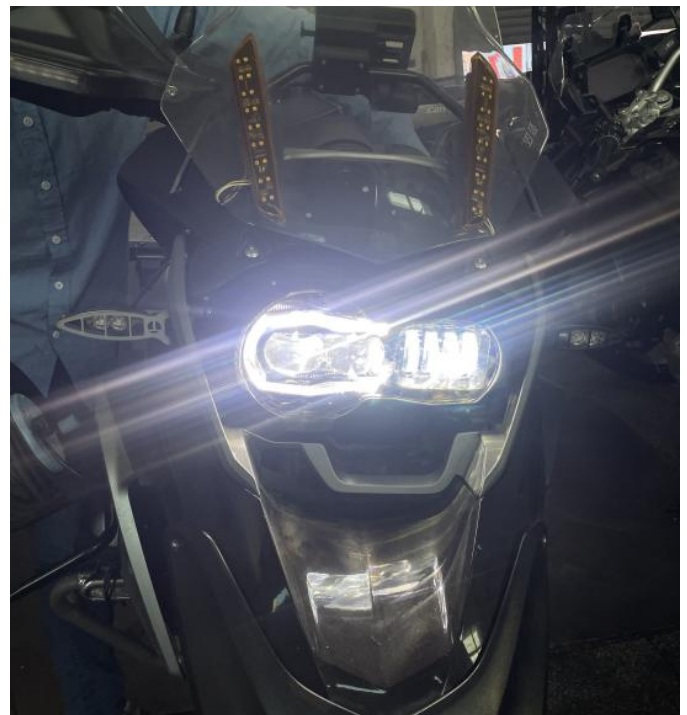

5.Installation finished.

4. After connecting the wiring harness, start the motorcycle and turn on the headlight switch to check if the low and high beams of the headlights are on. After confirming that they are correct, use the original motorcycle screws to fix the headlights and the previously removed decorative parts. As the picture shows:

Note: Please refer to the installation video in the Amazon listing before your installation, or contact the seller for the installation video.
