

LED Headlight for Kawasaki Versys-X300

VST-010701-002

BEFORE YOU BEGIN

Read these instructions and check to be sure all parts and tools are accounted for. Please retain these installation instructions for future reference.

IMPORTANT

This LED Headlight is exclusively designed for your motorcycle. Please read the installation instructions thoroughly before beginning. Installation is easier if the motorcycle is clean and free of debris.

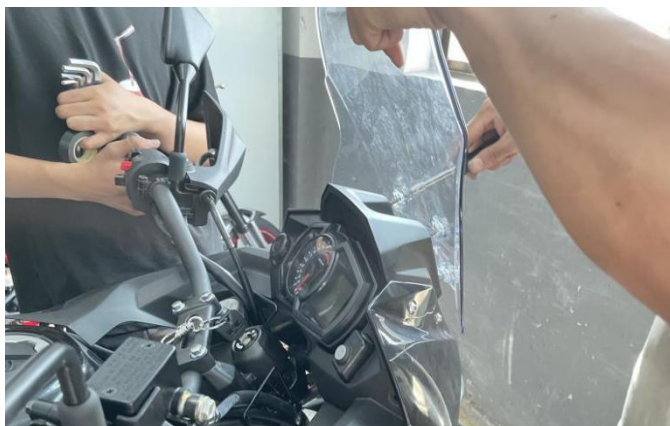

INSTALLATION INSTRUCTIONS

Note: Shift motorcycle transmission into "PARK". Turn key to "OFF" position and remove from motorcycle.

1. Products Display

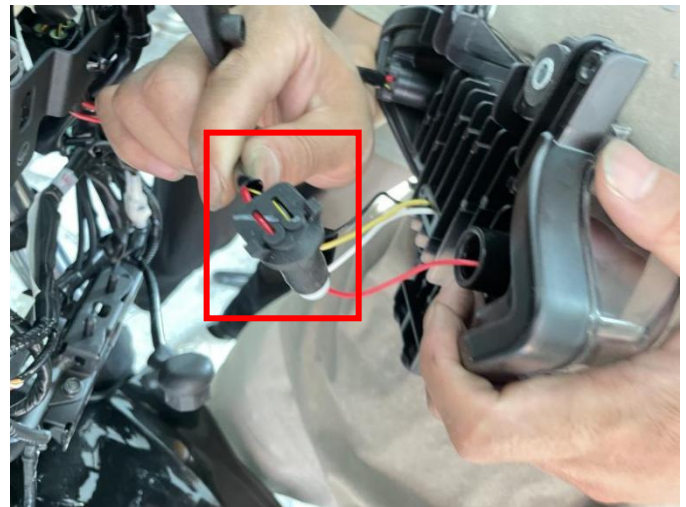

2. First, remove the original windshield, headlight decorative cover, and headlights. The circular rubber pads and steel clips on the original headlights should be moved to the new headlights according to their original positions. As the picture shows:

3. Remove the daytime running light bulb from the original headlight and insert the rubber base into the rear housing of the new headlight. Connect the red small wire of the daytime running light on the other side of the new headlight to the other rubber base of the original daytime running light (the red wire needs to correspond to the red wire). Then connect the main line of the new headlight, turn on the power after completion, check if the headlight is functioning properly, and install and fix the headlight after confirming it is correct. Finally, install the other accessories that were previously removed back in place. As the picture shows:

4. Installation finished.
